

Atty. Docket No. 569.005

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. **(Currently Amended)** A system for facilitating commercial food management, said system comprising:

means for recognizing an authorized user accessing the system remotely;

means for providing at least one suggested menu which meets predetermined nutritional criteria, wherein said one suggested menu is associated with at least one predetermined diet;

means for providing nutritional information relating to said at least one suggested menu.

2. **(Original)** The system of claim 1, wherein the at least one suggested menu is based upon the regional location of the authorized user.

3. **(Original)** The system of claim 1, wherein the at least one suggested menu is based upon a patient's preference.

4. **(Original)** The system of claim 1, wherein the at least one suggested menu is based upon food products the authorized user currently has in stock.

Atty. Docket No. 569.005

5. **(Original)** The system of claim 1, wherein said means for providing nutritional information includes a plurality of databases, including a food item database, a recipe database, and a master diet type database.

6. **(Original)** The system of claim 1, additionally comprising means to manage food inventory at the location of the authorized user.

7. **(Original)** The system of claim 1, additionally comprising means for an authorized user to order food supplies from within the system.

8. **(Original)** The system of claim 1, additionally comprising means for a user granted access to the system to interact with a proprietor of the system.

9. **(Original)** The system of claim 1, additionally comprising means for a plurality of users granted access to the system to interact with one another.

10. **(Original)** The system of claim 1, additionally comprising means for searching information contained within the system, including said nutritional information.

11. **(Original)** The system of claim 1, wherein at least one authorized user is associated with a health care facility.

12. **(Currently Amended)** A system for facilitating commercial food management, said system comprising:

means for recognizing an authorized user associated with a health care facility accessing the system remotely;

Atty. Docket No. 569.005

means for providing at least one suggested menu which meets predetermined nutritional criteria, wherein said one suggested menu is associated with at least one predetermined diet;

means for providing nutritional information relating to said at least one suggested menu.

13. (Currently Amended) A system for facilitating commercial food management, said system comprising:

a memory device for storing information relating to nutritional values associated with food;

a processor in communication with said memory device, said processor being adapted to:

create at least one suggested menu which meets predetermined nutritional criteria, wherein said one suggested menu is associated with at least one predetermined diet;

output said at least one suggested menu to at least one authorized user located remotely from said memory device; and

make available to the at least one authorized user the nutritional information associated with said at least one menu.

14. (Original) The system of claim 13, wherein the at least one suggested menu is based upon the regional location of the authorized user.

Atty. Docket No. 569.005

15. **(Original)** The system of claim 13, wherein the at least one suggested menu is based upon a patient's preference.

16. **(Original)** The system of claim 13, wherein the at least one suggested menu is based upon food products the at least one authorized user currently has in stock.

17. **(Original)** The system of claim 13, wherein said memory device includes a plurality of databases, including a food item database, a recipe database, and a master diet type database.

18. **(Original)** The system of claim 13, wherein said processor is additionally adapted to manage food inventory at the location of the at least authorized user.

19. **(Original)** The system of claim 13, wherein said processor is additionally adapted to permit the at least one authorized user to order food supplies from within the system.

20. **(Original)** The system of claim 13, wherein said processor is additionally adapted to permit at least one user granted access to the system to interact with a proprietor of the system.

21. **(Original)** The system of claim 13, wherein said processor is additionally adapted to permit a plurality of users granted access to the system to interact with one another.

22. **(Original)** The system of claim 13, wherein said processor is additionally adapted to permit searching the information stored within the memory device.

Atty. Docket No. 569.005

23. **(Original)** The system of claim 13, wherein at least one authorized user is associated with a health care facility.

24. **(Currently Amended)** A system for facilitating commercial food management, said system comprising:

a memory device for storing information relating to nutritional values associated with food;

a processor in communication with said memory device, said processor being adapted to:

create at least one suggested menu which meets predetermined nutritional criteria, wherein said one suggested menu is associated with at least one predetermined diet;

output said at least one suggested menu to at least one authorized user associated with a health care facility located remotely from said memory device; and

make available to the at least one authorized user the nutritional information associated with said at least one menu.

25. **(Currently Amended)** A method for facilitating commercial food management, said method comprising the steps of:

authorizing at least one remote recipient to receive information;

Atty. Docket No. 569.005

creating at least one suggested menu which meets predetermined nutritional criteria, wherein said one suggested menu is associated with at least one predetermined diet;

providing for computer-based viewing of the at least one suggested menu; and

making available to the at least one authorized recipient nutritional information associated with the at least one menu.

26. **(Original)** The method of claim 25, wherein the at least one suggested menu is based upon the regional location of the authorized user.

27. **(Original)** The method of claim 25, wherein the at least one suggested menu is based upon a patient's preference.

28. **(Original)** The method of claim 25, wherein the at least one suggested menu is based upon food products the authorized user currently has in stock.

29. **(Original)** The method of claim 25, wherein said nutritional information is maintained in a plurality of databases, including a food item database, a recipe database, and a master diet type database.

30. **(Original)** The method of claim 25, additionally comprising the step of managing food inventory at the location of the authorized user.

31. **(Original)** The method of claim 25, additionally comprising the step of an authorized user ordering food supplies from within the system.

Atty. Docket No. 569.005

32. **(Original)** The method of claim 25, additionally comprising the step of granting a user access to the system to interact with a proprietor of the system.

33. **(Original)** The method of claim 25, additionally comprising the step of granting access to the system to a plurality of users such that they may interact with one another.

34. **(Original)** The method of claim 25, additionally comprising the step of searching for information contained within the system, including said nutritional information.

35. **(Original)** The method of claim 25, wherein the remote recipient is associated with a health care facility.

36. **(Currently Amended)** A method for facilitating commercial food management, said method comprising the steps of:

authorizing at least one remote recipient associated with a health care facility to receive information;

creating at least one suggested menu which meets predetermined nutritional criteria, wherein said one suggested menu is associated with at least one predetermined diet;

providing for computer-based viewing of the at least one suggested menu; and

Atty. Docket No. 569.005

making available to the at least one authorized recipient nutritional information associated with the at least one menu.

37. (Currently Amended) A program storage device readable by machine for tangibly embodying a program of instructions executable by said machine to perform a method of commercial food management, said method comprising the steps of:

authorizing at least one remote recipient to receive information;

creating at least one suggested menu which meets predetermined nutritional criteria, wherein said one suggested menu is associated with at least one predetermined diet;

providing for computer-based viewing of the at least one suggested menu; and

making available to the at least one authorized recipient nutritional information associated with the at least one menu.

38. (Currently Amended) A program storage device readable by machine for tangibly embodying a program of instructions executable by said machine to perform a method of commercial food management, said method comprising the steps of:

authorizing at least one remote recipient associated with a health care facility to receive information;

Atty. Docket No. 569.005

creating at least one suggested menu which meets predetermined nutritional
criteria, wherein said one suggested menu is associated with at least one predetermined
diet;

providing for computer-based viewing of the at least one suggested menu; and

making available to the at least one authorized recipient nutritional information
associated with the at least one menu.
